

Divith KR

Bengaluru — Junior Developer

divith2526@gmail.com | 9353473258 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Junior Developer with hands-on experience in Full Stack Development using JavaScript, React.js, Node.js, Express.js, MongoDB, TypeScript, and PostgreSQL. Currently working at Curatal after successfully completing a Full Stack Developer Internship, contributing to scalable admin-side platforms and production-ready web applications.

Experienced in building secure REST APIs, responsive user interfaces, database-driven backend systems, and performance-optimized applications across the MERN stack. Contributed to key modules including Badges, Coaching, Mentor Platform, Candidate Feedback, and Women in Tech initiatives.

Comfortable working in Agile environments with cross-functional teams using Jira, GitLab, Postman, and modern development workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Redux, Tailwind CSS, Bootstrap, Material UI (MUI)

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, PostgreSQL

Tools: Git, GitHub, GitLab, Postman, Figma, VS Code, Jira

Other: Authentication (JWT, OAuth), API Integration, Responsive UI Development

EXPERIENCE

Junior Developer

[Curatal](#)

Apr 2026 – Present

Bengaluru

- Promoted to Junior Developer after successfully completing a Full Stack Developer Internship and contributing to core platform development.
- Working on scalable admin-side systems and internal platforms including Salary Predictor, Coaching and Mentoring modules.
- Developing and maintaining secure REST APIs, backend services, and responsive frontend components using React.js, Node.js, Express.js, and PostgreSQL.
- Optimizing application performance, improving database queries, fixing production issues, and implementing feature enhancements across the platform.
- Collaborating with cross-functional teams in Agile environments using Jira, GitLab, and Postman for task management, testing, and deployment workflows.

Full Stack Developer Intern

[Curatal](#)

Sep 2025 – Mar 2026

Bengaluru

- Contributed to production-ready admin modules including Badges, Candidate Feedback and CRM integration.
- Built and integrated secure backend APIs with authentication, validation, and role-based access control mechanisms.
- Developed responsive frontend interfaces and enhanced backend functionalities using React.js, Node.js, Express.js, and PostgreSQL.
- Worked closely with product and development teams to debug issues, improve workflows, and deliver scalable application features.
- Participated in Agile sprint cycles, API testing, bug fixing, and performance optimization activities across dashboards and internal systems.

- Completed an intensive self-learning full-stack development program focused on real-world application building.
- Developed multiple production-style projects using MERN stack technologies and PostgreSQL databases.
- Worked on the complete application lifecycle including frontend UI, backend APIs, deployment, authentication, and testing.
- Implemented CRUD operations, API integrations, responsive layouts, and secure authentication systems across projects.
- Collaborated using Git/GitHub and practiced Agile and Scrum development methodologies.

PROJECTS

RevGear

Git

E-Commerce Platform – Express.js, MongoDB, EJS, Tailwind CSS

- Developed a complete e-commerce platform with user authentication, product listings, shopping cart, order placement, and admin-side inventory management.
- Implemented secure session handling, password hashing, and admin authorization to ensure application security and protect user data.
- Designed optimized MongoDB schemas to reduce redundant queries and improve database performance by nearly 30%.
- Built a mobile-first responsive UI using Tailwind CSS to ensure fast load times and consistent user experience across devices.

Budget-Plan

Git

Budget Tracking App – React.js, HTML, CSS

- Created an interactive budgeting system enabling users to add, track, and categorize expenses with real-time visual feedback.
- Implemented dynamic state-driven calculations ensuring accurate balance updates, category totals, and monthly summaries.
- Integrated lightweight chart visualizations for clear financial insights and spending pattern analysis.
- Designed a clean and responsive UI focused on simplicity, accessibility, and usability across devices.

Touch-Evento

Git

Event Invitation Platform – React.js

- Developed a customizable digital invitation platform allowing hosts to create and share event invites with RSVP tracking.
- Implemented real-time RSVP updates enabling hosts to monitor guest confirmations and attendance status instantly.
- Optimized React component structure and state management for smoother interactions and faster rendering performance.
- Built a modern responsive UI ensuring seamless usability across desktops, tablets, and mobile devices.

Study Bangalore International

Git

Admission Booking Website – HTML, CSS, JavaScript

- Built a responsive admission booking and enquiry platform designed for accessibility and improved user experience.
- Improved navigation and user flow by structuring clear step-by-step form sections for faster submissions.
- Implemented robust client-side form validations to improve data accuracy and prevent invalid entries.
- Optimized frontend structure and asset loading to improve page performance and reduce load times.

EDUCATION

Bachelor of Science (Physics, Mathematics, Computer Science)

NMC Sullia, Mangalore University

Graduated: 2023

Pre-University Course (Science Stream)

Alva's PU College, Moodbidri

Graduated: 2019
